Trust	3	3 TO FIX
Phone	1	1 TO FIX
Accessibility	4	4 TO FIX
Security	1	1 TO FIX

Done

- ✓ Checked 100 of up to 100 public pages and reached the page limit
- ✓ Got results across 7 sections
- ✓ Everything else we measured came back clear
- ✓ Listed 19 items to fix, highest priority first

Fix these first

1. **No clear call to action found** on 1 page
   HIGH PRIORITY Conversion
2. **Meta description missing** on 1 page
   MEDIUM PRIORITY Search
3. **Open Graph tags missing** on 2 pages
   MEDIUM PRIORITY Search
4. **No way to contact you on the page** on 1 page
   MEDIUM PRIORITY Conversion
5. **Body text smaller than 16 px** on 100 pages
   MEDIUM PRIORITY Phone

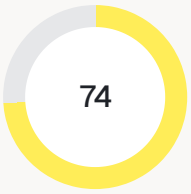

Not checked

- ◌ Pages past the 100 page limit
- ◌ Public files read for passwords and keys: Not included in this report because ownership of the domain was not verified. Public files are read for passwords and keys only once it is.
- ◌ Some checks had nothing to measure on these pages

Next

- ◉ Work through the 19 items, highest priority first.
- ◉ Public files are read for passwords and keys only on a report for a domain whose ownership is verified.

10 of 100 pages shown; every page is on the online report.

Search listing

85 percent of pages have both a title and a description that fit a search listing.

Title fits (30 to 60 characters): 86 of 100

Description fits (70 to 160): 99 of 100

Title phrase echoed by the heading or description: 81 of 100

Ways for a visitor to get in touch

Pages with a form: 6

Call links: 0

Email links: 14

Pages with at least one way in: 10

From Google

Google data shows here once a connected property has been read.

Leads

This is the site's first report. Leads show from the next one, for the month in between.
The two figures come from different places and are shown side by side, never added together.

Speed is measured in a browser on our server (lab figures, desktop viewport), graded against Google's published Core Web Vitals thresholds. Real visitors on slower devices will see different times. A dash means not measured on this report.

The AI row counts on-page checks only. ChatGPT mentions are not in this report. They appear once a reading is stored.

THE DETAIL

Every item, page by page

This is the summary. The detailed report lists every item to fix in each area, with why it matters, how to fix it and the pages it was found on.
